

Exceptional quality in high-demand prints, characterized by outstanding durability and stability.

PRODUCT FEATURES

It delivers outstanding performance during extended runs, accommodating high speeds while preserving consistent print quality. The specialized rubber top layer guarantees superior abrasion resistance, rendering it suitable for printing on rigid substrates like decorative metal, and exhibits high resistance to ghosting, resulting in sharp, durable prints.

TECHNICAL SPECIFICATIONS

Thickness	1.70 mm and 1.95 mm
Color	Therefore
Ink Compatibility	UV
Hardness	77 Shore A
Tensile strength	> 75 kg/cm
