

Engineered to satisfy the rapid requirements of plastic container manufacturing and embellishment.

PRODUCT FEATURES

Its surface is engineered to enhance durability and ensure consistent printing performance throughout the production process. Featuring a face compound specifically formulated to facilitate high ink transfer in both halftones and solid areas across all types of plastic containers, the blanket incorporates an improved outer layer that provides exceptional abrasion resistance, enabling the efficient printing of conical containers.

TECHNICAL SPECIFICATIONS

|                   |            |
|-------------------|------------|
| Thickness         | 1,96 mm    |
| Color             | Brown      |
| Hardness          | 75 Shore A |
| Ink Compatibility | UV and IR  |
