

Specially designed for use on high speed presses

PRODUCT FEATURES

It is a high-performance, environmentally friendly solution developed with zero-solvent technology and designed for a wide range of substrates and applications. It is waterproof against water and solvents, which guarantees superior durability and resistance. Ideal for commercial, web press and heatset printers, Strati Titanio ensures greater printing stability and accurate dot reproduction.

TECHNICAL SPECIFICATIONS

Thickness	1,70 mm e 1,96 mm
cor	blue
Ink Compatibility	Hybrids
Hardness	77 Shore A
Elongation	< 0,9%
Roughness	0.8 microns
